REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 2, none of the prior art of record taught or suggested that one skilled in the art would have placed an absorbent body on each of the non-slack portions of the web disposed on the pads (note that in claim 2 the "non-slack portion" is defined as that portion of the web disposed on the pad and that there would be no "non-slack" portion once the web was removed from the pads). With respect to claims 3 and 4, the prior art failed to teach that one skilled in the art would have placed an absorbent body on each of the non-slack portions of the web disposed on the pads and additionally failed to teach that those skilled in the art would have applied elastic to a first and second web in the manner claimed and then disposed the absorbent body on each of the first and second webs so that the absorbent body extends between the first and second webs. The reference to Pieniak (Figure 3) taught application of absorbent bodies 69 onto a web which has elastic applied between slack and non-slack regions, however the absorbent body is not applied to the web while the web was on the device which formed the slack and non-slack regions (it was applied downstream from this device). The reference to Sabee (Figure 7) taught that the absorbent bodies would have been applied to the web bearing the elastic (applied in a manner similar to that claimed as depicted in Figure 1) downstream from the formation of the web with the elastic after the web was removed from the device used to apply the elastic. The reference to Nakakado et al (Figure 6) taught application of the absorbent body downstream of the application of elastic between the slack and non-slack portions. In each of Nakakado et al, Sabee,

Art Unit: 1791

and Pieniak, the absorbent bodies are not applied to the web when slack and non-slack regions exist on the web of material carrying the elastic thereon. Each one of Kuntze, Sigl, and Rooyackers et al taught application of elastic in a manner similar to that defined in the claims; however the references do not disclose the association of the elastic carrying web with the absorbent bodies.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
